

5th Annual: 2023-2024

Med Tech Leadership Program

The most comprehensive education for Med Tech innovators, entrepreneurs, industry professionals, clinicians and anyone interested in learning a holistic view of how to successfully commercialize a regulated medical technology.

Program Scope + Overview

Free for Rhode Island-based residents, students, companies, and employees.

The Med Tech Leadership Program is designed to teach the best commercialization practices for regulated medical technologies. Example topics include medical device regulations, current industry trends, intellectual property, developing an investable business, raising capital, and more.

The Program consists of 50+ hours of classes and workshops over the span of 6 months. Programming will be held in person expect sessions taught by out-of-state advisors. In addition to educational sessions, participants will receive 2-5 hours of free mentoring with NEMIC Staff and Advisors throughout the duration of the program. Participants will translate their business idea and technology into an investable pitch deck. Those without their own idea can develop from a NEMIC case study.

The curriculum was created based on firsthand research interviews with industry professionals, CEOs, venture capitalists, angel investors, and seasoned Med Tech entrepreneurs. Read more about our curriculum research here: bit.ly/3R2omKF

Through this program, we aim to foster a community of fundable and successful Med Tech startups in RI. We'll do this by filling knowledge gaps, supporting an educated workforce, streamlining the development process for local organizations & lowering costs.

About the New England Medical Innovation Center

The New England Medical Innovation Center (NEMIC) is a not-for-profit Med Tech Venture Studio located in downtown Providence, Rhode Island. We support local, regional, and global Med Tech entrepreneurs and startups on their path to commercialization. Services include mentoring, education, programming, events, networking, and a collaborative innovation workspace. NEMIC's expertise in working with the FDA help our clients prepare for successful fundraising and technology commercialization in the field of healthcare, digital devices, and medical products.

Navigating a regulated industry is hard. NEMIC can help.
